THE CRYSTAL BALL AND MIND WANDER GAMES

PRIMING YOUR CLAIRVOYANCE

Before playing the Crystal Ball, perform the visualization where you actively take in purification energy through your crown or 7th chakra, as we discussed in the audio recording for Lesson 6.

The Crystal Ball

With a friend, take on the mindset that you are both young children, 5 or 6 years old, with an open and carefree imagination!

You've decided to play Crystal Ball together!

You're going to imagine looking into the crystal ball in front of you or if you've got a snow globe or round crystal lying around, cool!

Then...

You're going to close your eyes, ask for some information about or for the other person, and

then...make up the first thing that pops into your head. That's right, just make it up. If you've said nothing after the count of 10, you must make it up on the spot!

Don't worry for a second about being right or wrong because it's a game. No need to ask for validation and no need to apologize for what you are getting.

Take turns, if the other person is practising their skills too.

Play for at least 10-15 minutes to allow your beautiful ego off the hook about wondering if you right or wrong and the judgement around that.

Report in the Triple M Lounge - mention this recording module lesson (Open Your Intuitive Abilities -Lesson 6) and your experience!
